ABOUT ME

Aspiring frontend developer with a strong foundation in JavaScript and React.js. Ability to build responsive, API-integrated websites. Passionate about building clean UI and learning modern development practices. During my MCA, I faced financial constraints that caused a gap in my studies, but I used that time to focus on learning front-end development independently.

SKILLS

Technical Skill: React.js, JavaScript, HTML5, CSS3, Bootstrap

Other Tools: GitHub, Figma

PROJECTS

Mini-Ecommerce

- Fetched categories, products, products by category using the DummyJSON API.
- Managed UI state and rendering using React hooks (useState, useEffect).
- Project available on Portfolio website.

Ticket Management System

- Implemented a ticket management board with drag-and-drop functionality using **dnd-kit**.
- Managed global state efficiently with **React Context API**.
- Enabled ticket creation, status updates, and deletion with persistent storage via **localStorage**.
- Project available on Portfolio website.

To-Do-List

- Users can create projects where tasks can be added with the remaining days information.
- Managed user authentication using the Google Firebase Console.
- Project details and tasks are stored in Local Storage.
- Project available on Portfolio website.
