ABOUT ME

Aspiring frontend developer with a strong foundation in JavaScript and React.js. Ability to build responsive, API-integrated websites. Passionate about building clean UI and learning modern development practices. During my MCA, I faced financial constraints that caused a gap in my studies, but I used that time to focus on learning front-end development independently.

SKILLS

Technical: React JS, JavaScript, HTML, CSS, Bootstrap
Other Tools: GitHub

PROJECTS

Mini-Ecommerce

- Fetched categories, products, products by category using the DummyJSON API.
- Managed UI state and rendering using React hooks (useState, useEffect).
- Hosted the project on GitHub: https://github.com/RahulRameshKumarParmar/Mini-Ecommerce

Weather App

- Fetched real-time weather data using the API.
- Managed UI state and rendering using React hooks (useState, useEffect).
- Hosted the project on GitHub: https://github.com/RahulRameshKumarParmar/Weather_App

To-Do-List

- Users can create projects where tasks can be added with the remaining days information.
- Managed user authentication using the Google Firebase Console.
- Project details and tasks are stored in Local Storage.
- Hosted the project on GitHub: https://github.com/RahulRameshKumarParmar/To-Do-List
